

# Regional Exchange Fee Analysis

22 Nov 2023

- ASIFMA has benchmarked exchange fees and stamp duties across the Asia Pacific region, representing the collective work of its members
- The review attempts to normalize the metrics for a generic apples to apples comparison. The same sized trade has been broken into the typical shapes for each market with respective fees applied as each market has its own unique methodology
- Exchange fees now account for a significant portion of the cost structure for the Industry and are increasingly becoming an area of focus for market advocacy.
- Discussions with exchanges and regulators in the region underway to share perspectives as well as to confirm accuracy of the analysis.
- Detailed analysis behind these charts is available for members only.
